When a student begins a day at school, he enters a world apart from any other in which he lives. In this world he spends the largest part of each day. Through his daily relationships and activities his character is constantly being molded. At school among students and teachers, he is challenged to meet his own capabilities and thus he gains knowledge and understanding.

Within the following pages we, the Jeb Staff, shall seek to portray life in our own world of Stuart High School.

As we think of our world at Stuart High School we cannot help but reflect upon and recognize with great respect one who has been an inspiration, a trusted friend, a kindly advisor. For his guidance and understanding we shall always be deeply grateful. The staff of THE 1962 JEB is exceedingly proud to dedicate this volume to our principal, Mr. William Basil Watkins.

Mr. Watkins finds a moment of leisure during his busy day.

Dear Senior Class of '62:

You are now completing your public education and it is in order to extend to you "Congratulations" for your perseverance and final achievement.

You are standing on the threshold of a new and exciting life. Commencement is truly the beginning--the beginning of greater accomplishments and greater responsibilities. Some of you will go to college pursuing a higher education to better fit you for life. Others of you will take up your responsibilities in the business world. Wherever you go or whatever vocation you engage in, we hope and pray that the future will be good to each and every one of you. In this connection, you may rest assured that you may depend on us to render the best possible service to you and your community in every way that we know how. Your problems, either insurance or in civic affairs, are of prime interest to us.

Wishing you the best of luck for the future, we are,

Sincerely,

Staff:

Mrs. Betty Jo Hundley  
Mrs. Elda L. Gilley  
Mrs. India H. Williams

## THE MOON... *and beyond!*

Bright, new horizons await today's students . . . new technologies . . . new medicines . . . even the moon and whatever lies beyond.

How far today's students go in this space age depends partly on their imagination but primarily on their training. Conquering new horizons will demand more of today's graduates — more knowledge, more skills, more training and more specialization.

Our Free Enterprise system, with its high living standards, gives everyone an opportunity to "shoot for the moon" in any field. Whether or not our target is reached depends on how well trained we are to launch ourselves.
